

# **The study of the cusp energetic particles using tracing particle simulations**

**A. Taktakishvili** (1), M. Kuznetsova (1), D. Sibeck (1), M. Hesse (1), L. Rastaetter (1), M. Maddox (1), A. Chulaki (1), T. Gombosi (2) and D. DeZeeuw (2)

(1) NASA Goddard Space Flight Center (staktak@lssp-mail.gsfc.nasa.gov), (2) University of Michigan

Using tracing particle analysis we will study possible sources of the cusp energetic particles (CEP) observed in the cusp. We will employ the University of Michigan BATSRUS global MHD code results as an input for the magnetospheric configuration. Different ion species will be also discussed.
