## **OMEGA/Mars Express: 4 years of VIS/NIR hyperspectral mapping**

**J-P. Bibring**, and the OMEGA team

IAS, Orsay, France (bibring@ias.u-psud.fr)

The OMEGA data set offers an unprecedented means to monitor Mars evolution at all timescales, from seasonal to climatic and geological variations. We will summarize the major outcomes, and discuss them in the perspective of the future NASA and ESA missions.
