

# **Results from the TOUGH project**

**H. Vedel**

Danish Meteorological Institute, Lyngbyvej 100, DK 2100 Copenhagen (hev@dmi.dk)

TOUGH (Targeting Optimal Use of GPS Water Vapour Measurements in Meteorology) was an inter European 3-year EC project, involving 15 European institutes from meteorology and geodesy, on the use of ground-based GPS data in NWP, covering all aspects from processing of GPS data, to assimilation of GPS delays in NWP models, and impact studies. The project finished earlier this year.

The presentation will provide examples of results from TOUGH.
