Terry M. Seward wins EGU Robert W. Bunsen Medal 2005

Terry Seward

The Canadian scientist Terry M. Seward has won the prestigious Robert W. Bunsen Medal 2005 for his pioneering contributions in hydrothermal geochemistry, particularly the development and application of in situ techniques to determine compositions and structures of hydrothermal solutions.

This medal has been established by the EGU Division on Geochemistry, Mineralogy, Petrology & Volcanology in recognition of the scientific achievements of Robert Wilhelm Bunsen. It will be awarded for distinguished research in Geochemistry, Mineralogy, Petrology & Volcanology.

The jury: 'In summary, Terry M. Seward is a very versatile earth scientist who made profound, outstanding and fundamental contributions leading to breakthroughs in various fields of earth sciences with emphasis in high-temperature geochemistry.'

Prof. Seward will accept his medal and give a lecture, titled: '**Molecular Insight into Hydrothermal Solution Geochemistry**' at the EGU General Assembly, to be held in Vienna, Austria from 24 – 29 april. The lecture starts at 19.00 – 20.00, at the 25th of April.

Terry Seward is currently Professor of Experimental Geochemistry at the Department of Earth Sciences at the Eidgenössische Technische Hochschule Zürich, Switzerland.
