

An Initiative for Organizing International Cooperation in Space Exploration

J.E. Blamont

Centre National d'Etudes Spatiales (CNES), Paris, France (jacques.blamont@cnes.fr)

It is suggested that at the Beijing COSPAR Assembly in July 2006, a panel meet to discuss the creation of an International Space Exploration Council to provide guidance in preparing future cooperation on space exploration by:

- coordinating ILEWG and IMEWG;
- analyzing the possibilities of joint actions for the elaboration of an international road map in planetary exploration;
- implementing cooperative ventures through agencies.
