

# **How to understand the low value of Fe/O in the GLE event on 2003 October 28**

G. M. Le(1,2)

Y. H. Tang(1,2)

1. National Center for Space Weather Monitor and Forecast, China Meteorological Administration
2. Department of Astronomy, Nanjing University, Nanjing 210093

Based on the solar flare and radio burst data on 2003 October 28, and the relativistic protons recorded by neutron monitors, the traveling path of the relativistic protons and near relativistic electrons is reanalyzed. The reason of low value of Fe/O was also analyzed.
