

## **Sensitivity analysis of the Slovak territory to creation the Floods**

G. Babiakova, D. Leskova, O. Majercakova

Slovak hydrometeorological institute (gabriela.babiakova@shmu.sk)

Large floods in recent years caused large damages of infrastructure, properties and fatalities, as well. Analysis of the Slovak territory from view of potential sensitivity on flood events was done. The contribution in form of poster is a presentation of “flood index” applied to look on sensitivity of the Slovak basins on flood extremes occurrence. Also the description probability of precipitation will complete the complexity of discussed processes.
