

Examination of the accuracy of position determination by the DGPS system

R Bober, T. Szewczuk, **A. Wolski**

Maritime University of Szczecin (Poland)

This paper presents the results of the assessment of position transmitted from Dziwnow and Hammerodde reference stations. The research, including six locations in the vicinity of Zalew Szczecinski (Lake Szczecin), aimed at the determination of how the elimination of selective availability affects position accuracy in the DGPS system.
