

Monograph "Geodynamics of Balkan Peninsula"

G.Milev(1), K.Vassileva(2),

(1)Institut of Water Problems, Bulgarian Academy of Sciences, Bulgaria,(2)Central Laboratory of Geodesy, Bulgarian Academy of Science, Bulgaria)

Preconditions, aims, methodology, organisation of the work, main stages of the investigations within the framework of the CERGOP-2 Project have been summarised. The stress have been laid on the creation of a generalised picture of the Balkans - development of the investigations of regional geodynamics and establishment of the active interdisciplinary collaboration in the region resulting in a monograph. The structure, content and authors of the monograph have been given. Short comment on the monograph has been presented
