## **The International Centre for Global Earth Models (ICGEM)**

**F. Barthelmes, W. Köhler**

GeoForschungsZentrum Potsdam, Department 1: Geodesy and Remote Sensing,  
Telegrafenberg, D-14473 Potsdam, Germany

The ICGEM is one of six centres of the International Gravity Field Service (IGFS) of the International Association of Geodesy (IAG). The major task of the ICGEM is to collect all available global gravity field models and to offer a user interface on the web. There the models can be downloaded, visualized and used for calculating grids of different gravity field functionals. The Poster shows the current status of the ICGEM as well as the future plans.
