

STEREO - The European Science Perspective

V. Bothmer (1) and R.A. Harrison (2)

(1) University of Goettingen (bothmerqastro.physik.uni-goettingen.de/0049551395043), (2)
Rutherford Appleton Laboratory

European institutions have provided major contributions to the scientific payload of the NASA STEREO mission, successfully launched on October 25, 2000, including both, remote-sensing and in-situ instrumentation. This presentation provides an overview on the key research activities in Europe, taking into account international collaborations.
