

Results from the South-Eastern-Alps-campaign 2006

C. Haslinger(1), S. Krauss(1), G. Stangl(2)

(1) Space Research Institute, Austria (cornelia.haslinger@oeaw.ac.at), (2) Federal Office of Metrology and Surveying, Austria (guenter.stangl@oeaw.ac.at)

A GPS campaign within the CERGOP project was performed in the region between Austria and Croatia in 2006. Due to problems only two epoch sites of the measurements 1994/5/8 could be reoccupied. To have comparisons the campaign was adjusted in the manner before the big change in November 2006 according to the guidelines of IGS/EPN. Additionally the weekly results of the available non-EPN stations of the regions are shown in a time series. The campaign was also processed due to the new IGS/EPN guidelines to check the differences.
