## **The seasonal circulation over the Israeli continental shelf and slope**

Z. Rosentraub

Israel Oceanographic and Limnological Research, Haifa, Israel (zviros@ocean.org.il/ Fax: 972-4-8511911, Phone: 972-4-8565248)

The seasonal circulation over the Israeli Mediterranean continental shelf and slope is presented, based on subsurface current meter moorings as well as on recent ADCP measurements and numerical modeling. Of special consideration is the cross-shelf circulation during winter and the effect of the open sea and the presence of an along-slope jet on the circulation over this narrow shelf.
