

# **A Tale of Two Valleys – activities and collection of experiences with surveys and project management by the pupils of the BG/BRG Zell am See within the framework of the Austrian Climate Change research project**

P. Graf (1), E. Hochhold-Falkner (1); **I. Auer** (2), R. Böhm (2), A. Kirchengast (3), N. Vetter (3), F. Lainer (4); students of the 5r and 5g class of the BG/BRG Zell am See

(1) BG/BRG Zell am See

(2) Central Institute for Meteorology and Geodynamics, Austria

(3) Joanneum Research, Graz

(4) National Park of Hohe Tauern, Salzburg

With their form masters, teachers and representatives of the Central Institute for Meteorology and Geodynamics, of the National Park Hohe Tauern and the Joanneum Graz, the pupils of the 5th forms (9th school-year) are going to discuss the following topics within the framework of lectures, excursions and questionnaire campaigns:

mountain ecology

history (gold mining, ...) and geographical conditions (climate, glaciers, ...)

the Sonnblick Observatory

tourism and youth in the Rauris valley

In lessons at school, a project diary is written and workshops as well as a questionnaire layout and its statistical analysis are made.
