Use of extreme statistic methods at The Danish Meteorological Institute

K. Sarup

Danish Meteorological Institute, Data and Climate Division, ks@dmi.dk / Phone: +45 3915
7500

The Danish Meteorological Institute has over the latest years experienced a larger demand for statistic analysis, in regards of return periods of extreme meteorological parameters like precipitation, temperature, wind speed, and lightning strikes (typical 20, 50, 100 years events). The presentation will show the statistic method used and some examples of these analyses.
