Titan's Lakes from Cassini VIMS

R. H. Brown (1), L. A. Soderblom(2), D. Lytle

(1) University of Arizona, Tucson, Arizona, USA, (2) U.S. Geological Survey, Flagstaff, Arizona, USA

Observations by Cassini VIMS of a possible lake near Titan's north pole were obtained on the T26 flyby of Titan. The interior regions lake show strong spectral contrast with respect to the surroundings of the lake. The observations and their implications for the composition of the lake material will be discussed.
